Murray-Darling Petition

Help us help the basin. We need urgent action and aim to present this to the Federal and State Governments.

To the Australian Federal Government, New South Wales Government, Queensland Government, South Australian Government and Victorian Government. We the people of Australia and supporters around the world, via this petition, are disappointed in the lack of support, response and action to the management and deepening water crisis of the Murray-Darling Basin. As a result, this petition represents a lack of confidence in those responsible for timely decision making processes.
